

MQ-3000(HPLC) Glycated Hemoglobin Analyzer

Precise | Compact | Hb-Variant Detection

Medconn is the leading brand in the field of HbA1c testing in China, which focus on HbA1c HPLC products research and production.

DIAGNOSTICS FOR MEDICAL CONNECTION

MEDCONN
DIAGNOSTICS

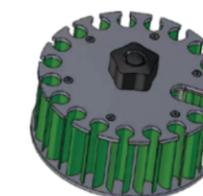

Specifications

Principal	High Performance Liquid Chromatography(HPLC) Ion Exchange
Sample Handler	Dilution and Whole Blood Sample Auto-switching Sample Barcode Auto-reading Cap Piercing
Time for Analysis	<120s/test
Sample Aspiration Volume	Whole Blood 4μL
Loading Capacity	18 Samples
Measuring Range (NGSP)	3.0%-20.0%
Precision	CV ≤ 2%
Result Output	Internal Terminal Printer External Printer Lis System USB
Data Storage	100,000 Results with Graph
Reagent Kit Specification	All in one package: 400 tests/kit, 800 tests/kit
Operation Environment	10°C-30°C Humidity: ≤ 70% Altitude: Self-adaptive ≤ 2000m
Dimension	457 mm×325 mm× 521mm (L* W* H)

Compact and Functional

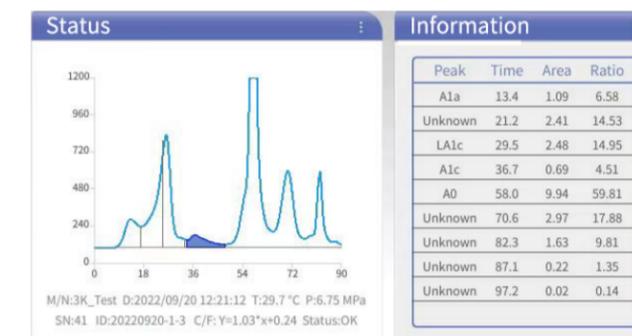

Easy operation

- Disc design sample panel
- 18 samples can be loaded at a time
- Samples can be inserted at any time during operation
- Simple and easy-to-use interface

Separation of hemoglobin from interferences

- HbD, HbS, HbC, HbE

Multiple input/output devices

- Graph can be transmitted to Lis system
- External printer can be connected
- External bar code scanner can be connected
- Built-in thermal printer
